1200t
capacity
at 240m

Fly Jib
providing
240m Hook
Height

HLP
**HEAVY LIFT
PROJECTS LTD**

**HLP130 -
Luffer**

At HLP, we are bending the book on capacity.

The standard configuration of the HLP130 is a 130m, parallel main boom. Our main boom is modular and can easily be increased or decreased according to your requirements. In addition to this, our luffer takes the same simple engineering principle, to extend the lifting heights and reach to a new level. The HLP130 with luffer can achieve lifts of 1200t at heights more than 240m.
